

Quality Policy

JIOTIFY SOLUTIONS, an emerging provider of intelligent remote irrigation solutions for agriculture, has chosen to maintain satisfactory quality performance through its management system. The goal is to earn and preserve the trust of our stakeholders—clients, suppliers, personnel, the environment, and civil society—and to demonstrate that we are a responsible and sustainable company.

We are committed to our vision of being an undisputed leader in Tunisia and a regional benchmark in our field, in line with our mission to provide clients with intelligent remote irrigation solutions. We aim to contribute significantly to a more sustainable, efficient, and resilient agriculture that can face the challenges of climate change and water scarcity.

The quality policy we are implementing is built on four fundamental principles:

Innovation

Perfection

Excellence

Sustainability

Our approach is realized through the establishment of an effective and efficient **Quality Management System (QMS)** that meets the requirements of the **ISO 9001 v 2015** standard.

Given our context and the internal and external issues facing our company, our Quality Policy is defined and driven by the following strategic axes:

1. **Focus on the satisfaction of our clients and partners.**
2. **Ensure compliance with and adherence to legal and other applicable requirements.**
3. **Develop the marketing and commercial aspects of our brand image and products.**
4. **Develop our human capital by aiming for the skills enhancement and motivation of our employees.**
5. **Conduct continuous research and monitoring of market needs and expectations.**
6. **Continuously improve the effectiveness of our Quality Management System.**

To this end, **General Management** is committed to meeting applicable requirements and to the continuous improvement of our Quality Management System.

We encourage our employees to be actively involved in the success and implementation of this policy.

General Management
